DETAILED ACTION

Allowable Subject Matter

Claims 21-37 and 41 allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not teach or render obvious the claimed combination, in particular a printing process where a solution or suspension is composed of a evaporable liquid and a printing material, and after depositing the solution or suspension onto a substrate, a stamp is moved towards the solution or suspension deposited on the substrate without applying pressure, and the evaporable liquid is evaporated without evaporating the printing material. This draws the suspension or solution to the relief patterns by capillarity to the relief patterns found on the stamp, and deposits the printing material on the substrate in accordance with the relief patterns; therefore leaving the printing material on the substrate after the evaporable material is evaporated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
